Check out some flight footage of the Whirl Wind 300 Series Propeller!
See the KitPlanes Magazine article about the 300 Series Propeller Evaluation and the article comparing the 300 series to a Hartzell 3-blade.

Also to check out Paul Dye installs 300 Series propeller on his RV-3.

Tear down inspection interval is 5 yrs or 500 hrs. We can perform tear down inspections or we are also happy to send our manuals to another propeller shop of your choice to do the inspections.
