**Subject:** RE: Student Exploratory Aircraft Mechanics

Dear Mr. Martiny,

My son Andrew Meyers recently completed a SEAM class on circuitry and aircraft electrical systems that he enjoyed very much. He is interested in participating in future SEAM classes as well. He is a home schooled student, so we do not receive information via the public school about other classes that are offered through the SEAM program. Would you be able to keep us updated through email as other classes become available?

Thank you so much for your help.

Sincerely,  
Leigh Meyers
