NO.	PART	FUNCTION/DESCRIPTION
1.	Interchangeable Ear Seals	Durable, comfortable, and easily interchangeable for a customized fit.
2.	Comfort Head Pad	Universal fit with a padded opening designed to accommodate cap buttons for added comfort.
3.	Adjustable Headband Knobs	Turn the knobs to loosen the side clamps and adjust the headband height.
4.	Bluetooth Volume Control Knob	Activates Bluetooth and adjusts the Bluetooth media volume up or down.
5.	Volume Control Knob	Adjusts the volume for radio audio up or down
6.	Boom Mic	Stay Put Full Flex Boom Mic
7.	Mic Muff	Wind Blocking Mic Muff
8.	Charging Port	USB-C port charges the Bluetooth function.
9.	Indicator Light	Indicator Light for Bluetooth Connections

## QUICK START GUIDE

1. Adjust the headband height:
  - Loosen the knobs on either side
  - Slide it to either lengthen or shorten the headband
  - Tighten the knobs on either side.
2. Adjust the headband tension:
  - Pull out from the center of the headband for less tension.
  - Push in towards the center of the headband for more tension
3. Adjust microphone placement:
  - Ensure the mic is placed touching against the lips for best performance.
  - To change microphone position, always rotate the microphone down and around. The mic boom will be damaged if rotated too far upward.
  - Adjust for Right or Left-Hand Configuration: The RA210-BT headset allows the microphone to be placed on either the left or right ear cup by simply rotating it downward and back up.
  - You will need to swap the earcups if the microphone is moved to the otherside in order to keep the cup contours at the proper fit and orientation.

## TO REPLACE EARSEALS

1. Remove ear seals by reaching your fingers inside the ear cavity of the headset. Push up and out on the ear seal and it should pop out of the headset.
2. To replace the ear seal, line the ear seal up with the ear cavity on the headset. Press firmly and evenly along the long sides of the ear seal into the headset. The ear seal should click into place.

**NOTE:** The ear seals have a front / rear orientation. The slightly thicker part of the ear seal should be at the back of the head, below the ears.

## BLUETOOTH INSTRUCTIONS

1. When connecting to the headset for the first time, open your device's bluetooth settings and turn on pairing. Your device will begin scanning for nearby bluetooth devices.
2. Turn on the Headset Bluetooth using the knob on the ear cup opposite the Mic Boom. The headset will announce, "Power On"
3. The indicator light will flash blue and red, and the headset will announce, "Pairing".
4. Select "Rugged RA-210" from the list of Bluetooth devices on your phone.
5. The headset will announce "Connected" when paired. The indicator light will now pulse blue. **NOTE:** If pairing is not successful restart the process.
6. To turn off the headset's Bluetooth, rotate the Bluetooth knob fully counterclockwise. **NOTE:** The Bluetooth knob also controls the Bluetooth device's volume in the headset.

**NOTE:** The headset will automatically reconnect to the last device it was paired to when Bluetooth is turned on. If you do not wish to connect to that device, power the device off or turn off Bluetooth.

### LED LIGHT INDICATORS

Flashing Blue and Red= Pairing  
Red = Battery Low  
Blue Flash every 3-4 seconds= Connected

### WARNING

Limit distractions in the cockpit while in use. Set any adjustments before take off. It is advised to avoid Bluetooth use for any non-essential functions while in flight. Make sure any devices are switched to "Airplane Mode" prior to flight.
