

**VeloMini folding electric bicycles** are small, light weight, versatile, convenient, and durable. They fold down so small and you can take it with you practically everywhere.

**The New VeloMini Folding Electric Bicycle is the Perfect Solution for:**

- *Commuters using mass transit*
- *Racers and fans at the track*
- *Taking to the park or the city*
- *Owners of RVs, planes, and boats*
- *Students and staff getting around campus*
- *Getting around the ball game traffic*

**VeloMini Style**

VeloMini is the right bike for your life style. Whether you live in the suburbs, the city, on campus, or near the harbor, the VeloMini will make getting around in style a little easier, and a lot more fun.

**VeloMini** represents the latest technology in light-weight folding electric bicycles. The powerful 180 watt motor will transport you up to **12 mph without pedaling**. It folds to 18 inches high and fits into its own carrying case. The VeloMini is powered by a Lithium-Ion battery hidden in the durable anodized aluminum frame.
