

Mobil™ Aviation Grease SHC 100

Outstanding protection for aircraft wheel bearing applications

The demands placed on aircraft wheel bearings during landings are extreme. Choosing the right grease to protect these highly loaded bearings is essential to ensure the equipment's reliability.

Mobil™ Aviation Grease SHC 100 combines a wax-free polyalphaolefin synthetic base fluid with a lithium complex soap thickener and premium additives to:

- Provide outstanding protection against wear, rust, corrosion and high-temperature degradation, helping to extend the life of bearings, reduce downtime and maintenance costs
- Resist oxidation and remain stable in the presence of water, helping to extend re-greasing intervals and protect parts in hot, wet environments
- Enable easy start-up at low temperatures
- Deliver results in either manual or centralized greasing systems

Mobil™ Aviation Grease SHC 100 has a history of helping aircraft operators improve equipment reliability and minimize the potential for wheel/break-area fires.

Mobil Aviation Grease SHC 100 is approved by:

- ABSC (Meggitt)
- Dunlop (Meggitt)
- Goodrich
- Honeywell (Former AlliedSignal)
- Messier-Bugatti
- Parker-Cleveland
