

PRODUCT TECHNICAL DATA SHEET

SW055 FAST TACK Foam & Fabric Adhesive

DESCRIPTION: FAST TACK 55 is fortified with high solids for stronger, longer bonds. The snorkel tip provides uniform, soft glue lines that will not dimple. The quick tack and low soak-in feature leaves more adhesive on the surface of the substrate which results in stronger bonds.

USES: Use this product to bond fabric to most foam, metal or wood surfaces and to itself. Bonds most urethane and latex type foams to themselves in butt splicing, knife edging, laminating, boxing and edge turning operations and also to metal, rigid plastic and wood surfaces.
NOTE: Not recommended for bonding vinyl.
