THE SELF-RELIANT PILOT ALASKAN STYLE TRAINING

Self-Reliant Pilot was written to provide a multitude of aviation objectives. First and foremost it was written to provide an aviation book on the subject of flying and landing taildragger aircraft in remote and challenging parts of Alaska and showing all the wonders of this type of flying. It shows the inspiration of flying and landing in the mountains on gravel bars, on glaciers and on the beaches in fjords. It displays the magnificent wildlife found in Alaska. It shows the camaraderie of flying in Alaska. Self-Reliant Pilot provides useful information on flying and landing ski-equipped aircraft in winter on snow covered terrain and short field landing operations in summer on

Alaskan Bushwheels. Self-Reliant Pilot provides a complete explanation of who are the amazing elite Alaskan pilots along with their training program. It discusses the substantial number of aircraft accidents in Alaska and provides ways to greatly lower them to acceptable levels. The book was written to help fledgling pilots find alternative ways for becoming the best pilot they can be after receiving their Private Pilot License. The advanced training provided in the book is the most beneficial for General Aviation pilots that exist.....P/N 13-21536\$23.95

JEPPESEN AIRFRAMES AND SYSTEMS

Airframes and Systems provides a good grounding in the technical aspect of an aircraft's structure and systems, detailing, for examination purposes where required, the regulations that the student has to know and the methods by which these requirements are met. As with other subjects, there will always be areas that the student has studied that are not questioned in the exam. Learning this information is not effort wasted, as the information given within the volume provides the foundation knowledge on which the type rating course can be built.....P/N 13-07712\$103.99

JEPPESEN POWERPLANT

This volume gives the reader an insight into the construction, function, and operation of both piston and gas turbine engines. For examination purposes, the engines as described are to be considered 'generic', in reality each manufacturer will achieve the same objectives outlined in the text by different designs. Equip the reader with the knowledge to undertake with confidence an engine manufacturer's course or type rating course.

Volume #2P/N 13-11956\$39.85

ASA BEYOND FLIGHT TRAINING

Earning the Private Pilot license is a great achievement—now, expand your initial schooling to go Beyond Flight Training. The real excitement begins when the flight instructor lets go of your hand and you're left to set your own goals and create your own motivations. Veteran pilot and instructor LeRoy Cook shows you what lies beyond flight school. In these pages, he'll guide you into areas of aviation your instructors might not have mentioned. Things like planning your first cross-country flying vacation or sharpening your weather forecasting skills or pursuing advanced endorsements and ratings.
