

# BOSE® A20® HEADSET/ PROFLIGHT HEADSET

**Improved noise reduction. Greater comfort. Bluetooth® connectivity.** The most technologically advanced Bose® headset ever. **Bose® Acoustic Noise Cancelling® headset technology** - Sound is monitored outside the earcups and at the ears, unwanted noise is identified, and a correction signal is created to cancel the unwanted noise. **TriPort® acoustic headset design** - Proprietary Bose® technology uses acoustically tuned ports to optimize the low-frequency output of the system. **Adjustable boom microphone** - Provides the means of communication for pilots and passengers. **Proprietary ear cushion design** - Provides an important acoustic seal between the headset and the head. **Replaceable ear cushions** - Provide an important acoustic seal between the headset and the head. **Redesigned earcup architecture** - Provides more room for customers' ears without compromising overall headset size. **Magnesium alloy headband** - Provides strong, lightweight structural frame to support the headset and distribute the necessary clamping force. **Adjustable headband sliders** - Offer up to three inches of adjustment in headband length, using high-strength, aerospace-grade composite material. **Detachable sheepskin headband cushion** - Evenly distributes the headset weight across the user's head. **Center torsion spring** - Mechanical support for the headband joint, allowing it to be opened or closed to fit different head sizes. **Auxiliary audio input** - Input jack for external audio sources such as GPS systems and music players. **Male-to-male audio cable** - Provides the means to connect an external audio source to the headset. **Independent, recessed L/R volume controls with midrange detent and visual volume level indicator** - Adjust the headset audio volume level for left and right channels. **Power LED and battery-life indicators** - Indicates when the noise reduction is turned on. Indicates the remaining hours of battery life (green: healthy batteries, yellow: 2-8 hours, red: less than 2 hours). **FAA/JAA TSO-certified** - Meets or exceeds requirements for headset performance. **Limited 5-year transferable warranty** - Limited warranty coverage for parts, labor and second-day return shipping expenses of non-abusive malfunction. Made in the U.S.A.

Indicates when the noise reduction is turned on. Indicates the remaining hours of battery life (green: healthy batteries, yellow: 2-8 hours, red: less than 2 hours). **FAA/JAA TSO-certified** - Meets or exceeds requirements for headset performance. **Limited 5-year transferable warranty** - Limited warranty coverage for parts, labor and second-day return shipping expenses of non-abusive malfunction. Made in the U.S.A.

## BOSE PROFLIGHT SERIES 2 AVIATION HEADSET

The ProFlight Series 2 builds upon the advanced technology of the original and is the most lightweight, compact and comfortable aviation headset Bose has ever produced. ProFlight Series 2 is engineered and refined for the way professional pilots fly and now offers numerous updates and enhancements based on pilot input. ProFlight Series 2 features a new lighter, thinner more flexible cable providing increased freedom of movement and improved tap control for talk-through communication. Like the original, the ProFlight Series 2 is FAA TSO and E/TSO-C139a certified.
