CESSNA STEERING ROD BOOTS

Keep the exhaust and cold out of the cabin with these Kevlar/Fiberglass FAA/PMA approved Steering Rod Boots. These will last much longer & are less expensive than original Cessna boots.

Note: Priced and sold per boot. 2 units are required per aircraft.

FAA/PMA approved Steering Rod Boot application chart for Cessna Model Series 150, 152, 172, 175, and 182 Aircraft.

MCFARLANE CESSNA DRAWBAR ASSEMBLY

The McFarlane drawbar was uniquely designed to combat the common failure points of the OEM replacement, including broken loop ends or cracking. Both failures result in an inoperable door handle, requiring replacement of your drawbar. Our design incorporates several improvements, including its material, shape, and added washer. The OEM drawbar is made of aluminum, compared to our stronger stainless steel material that is less prone to cracking or failure, resulting in a longer lifespan. We also redesigned the shape of our drawbar that prevents popping on the door handle during operation, which creates a wear spot and bends the drawbar (resulting in failure). Lastly, we added a unique spacer for an improved fit and less noise during use!

INTAKE HEAT SHIELD DEFLECTOR

This part replaces Cessna part number 0750121. This intake Heat Shield Deflector is vibration dampened to prevent cracking! It is made of polished stainless steel for better heat control. FAA approved.

CESSNA TORQUE LINK SHIM KIT

Brass Nose Gear Torque Link Shim Kit for Cessna Aircraft
Features: • Only McFarlane has three shim sizes for a precision fit • Eliminates undampened torque link motion to prevent shimmyP/N 05-15394

MCFARLANE TRIM TAB ACTUATOR FOR CESSNA AIRCRAFT

This direct replacement trim tab actuator incorporates many design improvements. Longer lasting coatings are utilized for increased service life, smoother operation,

and improved corrosion resistance.

The Trim Tab Actuator is manufactured with high strength stainless steel alloy that has been nitrocarburized for maximum wear, low friction, and smoother thread operation than the OEM part. The sprocket is made from stronger aluminum, then anodized for wear and corrosion protection. The known problems of original parts have been addressed and resolved with this new design.....P/N 05-27269

MCFARLANE STABILIZER JACKSCREW ACCESS COVER

McFarlane Stabilizer Jackscrew Access Cover

Features:

- FAA-PMA approved for Cessna: 180, 180A, B, C, D, E, F, G, H, J, K
- 185, 185A, B, C, D, E, G, A185 E, F
- Quick and easy access to tail cone and jack screws
- Saves time
- Adds airplane value

Finish	Part Number	Price
Primer Finish	05-27391	.

MCFARLANE TOOL NEUTRAL RIGGING ELEVATOR

Proper elevator rigging is necessary for full range of motion and maneuverability of the airplane. Many Cessna maintenance manuals require the fabrication of a tool to hold the yoke in the neutral position while the mechanic rigs the elevator control system. These tools utilize the holes for the control gust lock. At least 17 different sizes of rigging tools are required to cover the various Cessna aircraft. Now there is one tool to replace them all! The McFarlane Elevator Neutral Rigging Tool is adjustable from 0.4" to 2.5" and universal in design, consisting of six different pin sizes to fit your application. This tool may also be used to properly rig other makes of aircraft with similar elevator neutral rigging requirements.
