

LIGHTSPEED ANR HEADSETS

LIGHTSPEED ZULU 4

It's hard to improve on the best-selling Zulu 3. But we managed. The Zulu 4 builds on the proven performance of the Zulu 3, delivering the comfort, clarity, and flexibility pilots asked for without sacrificing the features that made the Zulu series an industry favorite. With legendary Lightspeed comfort, advanced ANR, ComPriority™, audio recording capability, and durable construction, Zulu 4 delivers a refined headset experience designed around real pilot feedback. **More Comfort** – All-new FrameFit™ ear seals

are designed to better conform around glasses, hats, and sunglasses. Tapered foam reduces pressure points while maintaining a consistent

seal, helping minimize fatigue and maximize ANR performance on long flights. **More Clarity** – Enhanced upstream audio ensures up to 90% reduction of background noise in outgoing transmissions sent over Bluetooth. Whether making phone calls from the air or connecting with ATC from the ground, your voice comes through crisp and clear. **More Flexibility** – Zulu 4 supports multipoint Bluetooth®, allowing two devices to stay connected simultaneously. A longer mic boom and upper cable offer improved positioning and freedom of movement, while flexible power options support panel power with AA battery backup.

LIGHTSPEED DELTA ZULU®

Intelligent safety. Personalized hearing. Premium performance.

Lightspeed Delta Zulu® is designed for pilots who want more than noise reduction alone. Built around Lightspeed's best ANR to date, Lightspeed Delta Zulu introduces intelligent safety and hearing technologies that actively support pilot awareness, comfort, and long-term hearing health on every flight.

Lifesaving & Life Changing – Kanari® smart alert technology is built directly into the headset to monitor cabin carbon monoxide levels and deliver audible alerts when elevated CO is detected, helping pilots stay informed and responsive in critical moments. The

Lightspeed Delta Zulu also features HearingEQity®, an integrated hearing-aid and personalization technology system that adapts communications to your individual hearing profile, created through a brief, 12-frequency automated hearing assessment.

Built for Premium Comfort and Durability

The Lightspeed Delta Zulu features a low profile fit, stainless steel headband, magnesium ear cups that are 20% larger than competitors to allow for greater comfort and noise cancelation, and Kevlar core cables. Additional features include Bluetooth® connectivity, ComPriority™, Auto Shutoff, an easy-to-replace battery with the option of using

LIGHTSPEED ZULU 3

Proven performance. Legendary comfort. Built to last. The Zulu 3 is a long standing favorite among general aviation pilots, known for its exceptional comfort, reliable ANR performance, and durable construction. Designed for pilots who invest in quality equipment for the long haul, Zulu 3 delivers a premium flying experience backed by Lightspeed's industry leading 7 year warranty.

Superior Quiet and Comfort– Legendary Lightspeed comfort starts with Lightspeed's performance ear seals, which provide 20% greater surface area than competitors, for a better seal and a more even distribution of

side pressure. The large ear cups create ample space for your ears, improving passive noise reduction and helping reduce fatigue during extended flights.

Premium Features and Durability - Zulu 3 features a low-profile fit, stainless steel headband, magnesium ear cups, and Kevlar core cables for long-term durability. Advanced ANR technology and ComPriority™ help ensure critical communications are never missed. Bluetooth connectivity supports music streaming, phone calls, and audio alerts from aviation apps, while compatibility with the free Lightspeed iOS app allows recording and playback of ATC and cockpit communications. Trusted by pilots for years, Zulu 3 remains a benchmark for premium ANR headsets delivering comfort, performance, and reliability that stand the test of time.

CLOUD9 HEADSET CONTROLLER HOLDER – LIGHTSPEED DELTA ZULU

In The Box: • Headset Controller Dock for Litespeed Zulu & Sierra Series 3D printed in Black Polycarbonate. • 2ea suction cups with threaded stud for use when in suction cup mounting configuration. • 1ea clamping plate with threaded inserts for use

when hard mounting to instrument panel or soft interior panels. 3D printed in Black Polycarbonate. P/N 13-25581.....

LIGHTSPEED SIERRA®

All-day comfort. Proven ANR performance. Exceptional value.

Step into active noise reduction with the Sierra ANR headset. Designed to deliver essential features, reliable performance, and all day comfort, Sierra is an ideal choice for pilots and passengers seeking quality ANR at an accessible price point.

Comfort You'll Notice Immediately -

Sierra features the same large magnesium performance ear seals as other premium Lightspeed ANR headsets to provide a comfortable fit and effective noise reduction. A low-profile, lightweight, and adjustable headband accommodates a wide range of

head sizes, while the reversible microphone allows for left or right-side placement for flexible cockpit seating.

Essential Features that are Built to Last

Sierra offers Bluetooth connectivity for music, phone calls, and audio alerts from aviation apps, along with compatibility with the free Lightspeed iOS app for recording and playback of ATC and cockpit communications. Durable fiber-reinforced polymer construction and a 5-year warranty ensure reliable performance flight after flight.
