

IFR SIMULATORS

HONEYCOMB ALPHA FLIGHT CONTROL YOKE AND SWITCH PANEL

The Honeycomb Alpha Flight Control is the most advanced flight simulation system available to simmers, flight students, and pilots for setup at home and features a complete backlit switch panel and ignition switch. It was designed and developed in California by pilots and aerospace engineers to ensure the most realistic flight experience.

HONEYCOMB BRAVO THROTTLE QUADRANT

The Bravo Throttle Quadrant is an all-in-one cockpit system featuring a fully configurable throttle setup. Six general aviation and six commercial levers are included and can be arranged from single-engine general aviation all the way up to four-engine commercial aircraft. The commercial levers include flaps, spoilers, and functional thrust reversers while the general aviation levers include

power, prop, and mixture and can engage thrust reverse for turbo props as well. The throttle also features multiple cockpit components including an autopilot panel with backlit buttons, annunciator panel with 14 warning lights, Gear Lever with landing gear indicator lights, general aviation flap lever and a trim wheel. The throttle also comes with Honeycomb's dual mounting system which includes two heavy duty steel clamps and a large 3M® Micro-Suction Pad that can be used as a clamp-free solution. The Honeycomb Bravo Throttle Quadrant was designed to ensure the most versatile flight simulation experience possible.

HONEYCOMB ALPHA YOKE / BRAVO THROTTLE DUST COVER

The Dust Cover by Honeycomb Aeronautical is designed and made for both the Alpha Flight Controls and Bravo Throttle Quadrant. The cover itself protects from any unwanted dust or potential damage while preserving the condition of the Yoke or Throttle. Easily apply and remove the cover when mounted on the desk or use as a storage solution when not in use.

HONEYCOMB ALPHA YOKE + BRAVO THROTTLE QUADRANT + CHARLIE RUDDER PEDALS FLIGHT SIMULATION BUNDLE

The Honeycomb Flight Simulation bundle combines an Alpha Flight Controls Yoke & Switch Panel with the Bravo Throttle Quadrant and the Charlie Rudder Pedals to provide an all-in-one cockpit system. This combination provides the most advanced flight simulation system which is available to simmers, flight students and pilots. The Alpha yoke has a realistic full 180° yoke rotation and a solid steel shaft with dual linear ball bearings that provide smooth control with a dampened, self-

centering mechanism and no center detent or dead zone. The Bravo Throttle Quadrant provides six general aviation and six commercial levers that can be arranged from single-engine general aviation all the way up to four-engine commercial aircraft. The Charlie Rudder Pedals brings the final piece to complete the full Honeycomb Flight Simulation Setup.
