OWNER ASSISTED AIRCRAFT MAINTENANCE

Have you ever wanted to participate in your aircraft's maintenance, but were afraid to try? Are the rising costs of flying keeping you on the ground? This illustrated manual, by Dan MacDonald, is written for the mechanically inclined Part 91 pilot owner/operators that are ready to learn more about their airplanes. It describes common maintenance activities that are approved for pilots to perform by the FAA, along with a number of other projects that you might wish to complete under the supervision of a certified mechanic. The book focuses on common "legacy" single engine aluminum aircraft built from the 1940s through today.

Whether changing your oil, installing new tires, or checking engine compression this 160 pages of text and photos provides procedures and tips gathered over the past 27 years. Soft cover; includes over 200 color photographs.....P/N 13-10244

SAY AGAIN, PLEASE: GUIDE TO RADIO COMMUNICATIONS

Talking on an aviation radio and understanding air traffic control (ATC) instructions can be one of the most intimidating aspects of flight training. In Say Again, Please Bob Gardner explains how the ATC system works and teaches pilots what to say, what to expect to hear, and how to interpret and react to clearances and instructions. His conversational-yet-concise writing style will help increase your comfort level when using an

aircraft radio.

FLIGHT INSTRUCTORS SURVIVAL GUIDE

After passing the FAA's Fundamentals of Instructing (FOI) knowledge test required of all instructors, the true challenge begins—applying that knowledge in the real world of teaching flight. Follow along as Arlynn McMahon lifts the FOI principles from the classroom and brings them into the cockpit. Her forty-four stories demonstrate the FOI principles in flight and offer practical strategies for dealing with both common and unexpected situations—all with wisdom, grace, and humor.

MY SKY - THE FLIGHTS AND TIMES OF BILL COX

Longtime pilot and writer Bill Cox entitled "My Sky: The Flights & Times of Bill Cox." Detail his lifelong travels as a pilot, in the beautifully scripted way in which only Bill can write.

Aviation writer/photographer and pilot Bill Cox has been in love with airplanes since the age of 13, though he refuses to admit how long ago that was. He survived his first airplane ride as a Civil Air Patrol Cadet in a Piper J-3 Cub on skis out of Merrill Field in Anchorage, Alaska, sometime in the middle of the last century. "We did a variety of search-and-rescue missions," Bill commented. "All search and no rescue." Starting in 1977, Bill

began delivering new and used aircraft overseas and has made 220 delivery flights across the world. Notably, and not chronicled in this book, Bill delivered Brad Pitt and Angelina Jolie's former Cessna Grand Caravan from Long Beach, California, to its new owner in Seoul, Korea. In a half-century of flying, he's had 13 engine failures (two at a time, see Chapter 11), but has only lost one airplane, a Piper Lance in the Ogaden Desert of Ethiopia in 1998 (also detailed in Chapter 11). Bill has logged about 15,000 hours in 60 years of flying.....P/N 13-23277

HUMAN FACTORS - ENHANCING PILOT PERFORMANCE

Today's aviation industry enjoys a remarkable safety record, primarily because it has learned from the mistakes of its past. Through the study of aviation accidents, most of the risks of flying have been identified and the threats they pose to safety can be managed. However, aircraft accidents, such as controlled flight into terrain, loss of control, runway excursions and incursions, and midair collisions still occur, and the hazards of flight remain.

MY LITTLE EAGLE: THEO LEARNS TO FLY CHILDREN'S BOOK

My Little Eagle: Theo Learns to Fly is an amazing aviation-inspired story written by Merici Huggins, a Minnesota based author from the Caribbean island of St. Lucia. The chronicles a little eagle (Theo) who could not fly because his wings were too short. Theo soon realizes there are other ways to fly and make his dream come true. The story is meant to entertain and inspire children of all ages to believe in themselves. It is filled with lessons about self-reliance, facing fears, overcoming challenges and disabilities, and achieving goals. It is also meant to spark an interest in airplanes and aviation in children. Pages: 24 pages, full-color illustrations. P/N 13-25690

ASA AN AVIATOR'S FIELD GUIDE TO THE SEAPLANE RATING

Knowledge and practical skills training to add a seaplane rating to your pilot certificate. In this practical guide for aspiring seaplane pilots, author Bill Young details what students need to know to earn their Airplane Single-Engine Sea (ASES) Rating. It is designed for pilots to use before and during training and provides a curriculum of flight and ground lessons, oral exam preparation questions and answers, and a focus on safety through scenario-based training and the use of checklists. The content is aligned with the Airman Certification Standards (ACS) to ensure all requirements are met, with references to the specific

ACS tasks addressed to guide further study. The author uses an example seaplane to illustrate concepts while providing spaces throughout for students to record details specific to the aircraft they are training in. The thorough study guide covers seaplane basics, reading the water surface, assessing the landing area, preflight procedures, maneuvering on the water, takeoffs and landings, beaching, docking, and important procedures and safety considerations specific to amphibious seaplanes. This guide will provide students with the knowledge and confidence to earn their ASES rating and become safe and competent seaplane pilots.
